Fitting the Adjustable Feet

The adjustable feet must be fitted to the base of the cooker before use. Rest the rear of the cooker on a piece of the polystyrene packaging exposing the base for the fitting of the feet.

Take care not to damage the range during this operation.

Fit the four legs by screwing them tight into the support base as shown.

Levelling the Range

- The range may be levelled by screwing the lower ends of the feet IN or OUT.
- Small adjustments may be made to the range in the upright position, however it may be necessary to tip the range again to make larger adjustments.
Fitting the Adjustable Feet Covers (optional)

If using the adjustable feet covers fit these while the range is tipped over.

1. Tip cooker onto its back and fix brackets to mounting holes.

2. Assemble the feet covers by slotting the inner cover inside the outer cover.
Gently bend the edges of the inner cover to adjust the tension between the two parts if needed.

4. Secure covers to brackets using the provided screws

5. Stand range back upright.

6. Adjust the inner panels of the foot covers to suit height of cooker feet.
